

# MUJEB ORGANIC FARM

## LOCALLY ROOTED ORGANICALLY GROWN

In operation since 2008 Mujeb Organic Farm is the leader in Jordan for growing Organic Certified vegetables.

Mujeb Organic Farm is certified on an annual basis by internationally recognized bodies insure that strict organic practices are met

## OUR CROPS

### *Vegetables*

We produce over 50 varieties of vegetables at a single time; from brassicas, to leafy greens, squashes, tubers and bulbs. Our production is seasonal and will change throughout the year

### *Fruits*

We have a wide selection of fruits throughout the year. Our season begins with strawberries in February, and is quickly followed by grapes, raspberries, blackberries and a selection of sweet stone fruits. We have three main locations for fruits. Our farm in Fuheis is purely rain-fed, giving exceptionally flavorful fruit.

### *Microgreens and edible flowers*

As we continue to expand our partnership with hotels and restaurants, we are growing our selection of specialty products that were previously unavailable in the local market. We now have a selection of microgreens and edible flowers that are excellent as a garnish and as elements of flavor and nutrition

### *Jarred products & dried goods*

In line with our philosophy of low impact and little waste, we established a line of dried and jarred products to make use of our excess produce when it is in season

### *Olive oil*

Our organic olives come from different farms with different elevations across Jordan. They are cold- pressed to give a unique oil that is characterized by its distinct light green color and intense fragrant aroma

### *Free range eggs*

Our eggs come from happy chickens that have access to fresh air and sun, and are free to roam around in a stress- free environment. The chickens are fed a 100% vegetarian and non-GMO diet and are not given any antibiotics.
