**ITEC Training Programme on
"Promotion of Public Private Partnership in Agriculture and Allied Sectors"**

Rationale and justification for the ITEC Programme at MANAGE, Hyderabad

The agriculture and allied sectors form the backbone of our economy, providing livelihoods to a significant portion of the population. Despite its importance, these sectors face numerous challenges, including limited access to resources, technology, and market opportunities. The proposed program seeks to bridge these gaps by fostering strong partnerships between public and private entities. MANAGE, an autonomous institution operating under the Ministry of Agriculture and Farmers' Welfare, has taken the lead in shaping extension strategies and capacity development in India. The robust capabilities of the Indian agriculture extension system, nurtured by MANAGE along with other research organizations and State Agriculture Universities, highlight the need to share these experiences for the advantage of policymakers, administrators, researchers, and field-level officials in other countries.

In addition to disseminating India's experiences and expertise through the ITEC programs on the Promotion of Public-Private Partnership in Agriculture and Allied Sectors, we anticipate benefiting from collaborative efforts with other nations. This collaboration offers opportunities for mutual learning and fosters goodwill between countries.

Aims and Learning Objectives

- To Analyze the various issues and aspects influencing the Public Private Partnership (PPP) in changing scenario of agriculture development
- To discuss the linkage mechanisms for Promotion of PPP in agriculture & allied sectors
- To develop the workable models of PPP in agriculture & allied Sectors
